

Travel information

**Toll Roads and Autopass****Foreign Drivers**

Foreign Drivers are welcome to Use the AutoPASS System.

With an AutoPASS tag and a valid contract you may travel on all toll roads with AutoPASS electronic fee collection, paying the different fees without having to stop. Toll roads offering AutoPASS are clearly marked with an AutoPASS sign.

You make an advance payment and establish an account with a Toll Road Operator. Each time you pass through an AutoPASS toll plaza, the fee is extracted from your account. When 75% of the amount on your account is spent, you receive a new invoice.

Visitors Payment

With "Visitors Payment" you can drive through all Norwegian toll roads in the AutoPASS-lanes and pay automatically in "Automatic Toll Stations" where there is no option for manual payment on the road itself. You do not need an AutoPASS tag.

You register an account and pay NOK 300,- for vehicles below 3 500 kg and NOK 1 000,- for heavy vehi-

cles. You can pay by VISA or MasterCard. All passages are debited your account. When the balance of your account is NOK 0,- another NOK 300,-/1000,- is charged to your credit card. Three months after your "Visitors Payment" has expired, the balance of your account will be credited your credit card.

You specify the period of agreement yourself. Maximum duration is three months. If you are to stay in Norway for longer than this, we recommend that you get an AutoPASS Contract.

Please note that you can pay for passages made 14 days prior to registering your credit card.

"Visitors Payment" is operated by Oslofjordtunnelen AS on behalf of the Norwegian Public Roads Administration and all Norwegian toll road companies. Oslofjordtunnelen AS will appear on your credit card bill. **See www.autopass.no to register.**

Automatic Toll Plazas

Several Toll Roads Operators have installed automatic toll plazas. The lanes are marked "Do not stop". Here you simply pass through, with or without AutoPASS. Automatic toll plazas are marked with this sign:

Foreign drivers can stop and pay at a nearby petrol station. Follow the sign as shown below.

If you don't stop and pay within three working days you will receive an invoice by post – with no extra charge. Norwegian Toll Road Operators use Euro Parking Collection plc in London, UK to collect the fees.

Without AutoPASS

As a tourist without an AutoPASS-contract you normally pass through the toll plazas in the lanes marked "Mynt/ Coin" or "Manuell". You either pay manually or at a coin machine. You need Norwegian coins to pay. Most toll roads have facilities for credit card payment.
